

The Soil sterilant for growers

- Application by grower or by contractor
- Controls a range of soil pests, nematodes, fungi, weeds
- No soil carryover residues*
- No crop residues*
- Outdoor and protected use
- Ideal for crops with limited or no herbicide choice

Latest Update on Basamid:

- **One in three year use – so need to plan ahead on a whole farm basis**

Guide to Best Results with Basamid

- Plan soil moist prior to application (10 days before)
- Check soil temperature
- Plan for 1 in 3 year applications
- Polythene cover (gas impermeable thickness)
- Contractor use or grower with adequate machinery
- Use spade-type rotovators (eg Imants/Forigo)
- Use measuring units (eg Horstine Farmery dispensers)

Basamid

Untreated
