

## Hatchet Xtra®

A post-emergence herbicide for control of a range of annual and perennial weeds in cereals, forage maize and grassland.

- Outstanding cleaver control at wide range of timings
- Can be used up to GS 45 in winter wheat and winter barley
- Controls many other broadleaved weeds including chickweed, volunteer oilseed rape, forget-me-not, fumitory, deadnettles and volunteer potatoes
- Controls docks (*Rumex* spp) and chickweed in permanent and rotational grassland
- Approved for use on forage maize
- Ideal complement to Metro Clear® (metsulfuron methyl) for broadleaf weed control in winter wheat and barley
