

## High Performance Slug Control

- 10 years expertise and field development making Iroxx® one of the leading slug pellet in the market
- High quality durum pasta formulation making the pellet very palatable to slugs
- Uniform pellet size, no dust, good spreading characteristics
- High number of baiting points compared to leading alternatives
- Iroxx® contains a food grade anti moulding agent ensuring durability in wet conditions
- Active ingredients are stabilized to give improved performance during wet conditions

Iroxx® carries the Ferric Field Technology trademark, **a sign of quality**

IROXX® is a registered trademark of W. Neudorff GmbH KG. IROXX® contains ferric phosphate. MAPP no. 16640

Marketed by: Certis, 3 Riverside, Suite 5, Granta Park, Great Abington, Cambridge CB21 6AD.

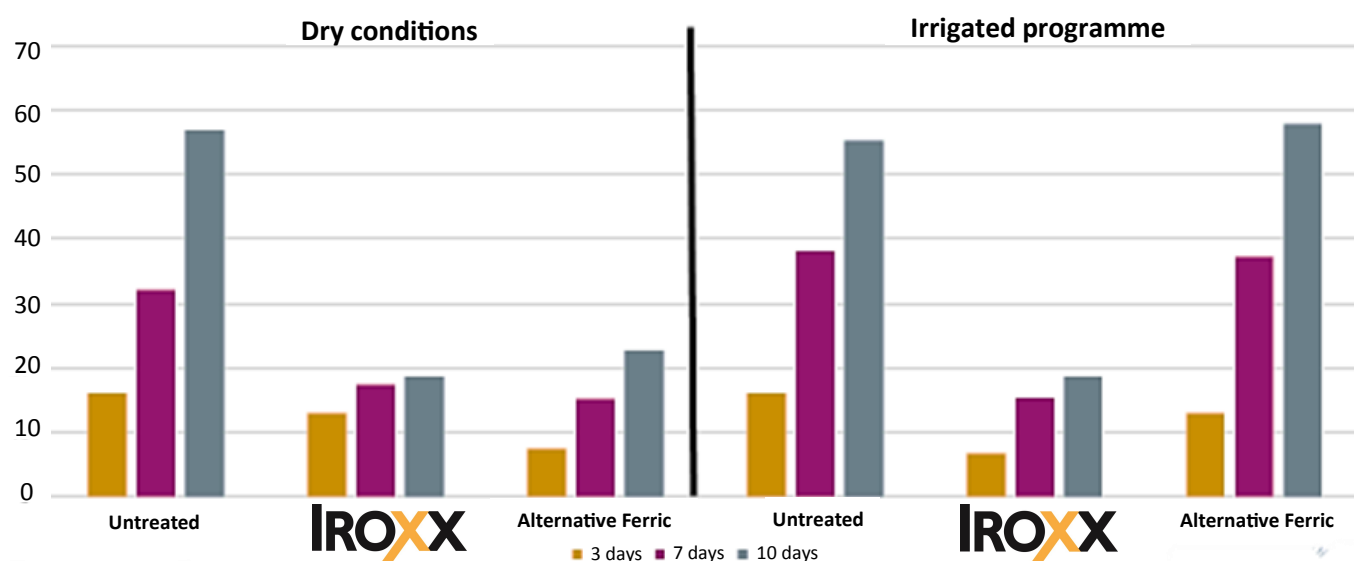

Tel: 0845 373 0305 Fax: 01223 891210 www.certiseurope.co.uk Certis©2019

## Not all ferric phosphate pellets are the same.

A very simple experiment clearly shows this:

- Grow susceptible plants in a tray.
- Apply slug pellets. Keep dry or irrigate with 5mm of rain twice per day
- After 4 days introduce a known quantity of grey field slugs
- Assess plant damage 3-10 days after slugs have been introduced

### % Plants attacked under Dry and Wet condition

Under wet conditions, when slugs are most active, the Iroxx formulation shows significantly better levels of protection versus a leading Ferric alternative.

### Baiting points

	Iroxx		Alternative ferric phosphate	
Dose rate	7 kg	7 kg	5 kg	5 kg
Approx. number of pellets/m <sup>2</sup>	60	43	43	31

- Iroxx® offers an excellent number of baiting points when compared to an alternative leading ferric phosphate pellet.

USE PLANT PROTECTION PRODUCTS SAFELY. ALWAYS READ THE LABEL AND PRODUCT INFORMATION BEFORE USE.
