

**Mogeton®
MAPP 15837**

A Wettable Powder containing 250 g/kg Quinoclamine. A selective moss killer for the moderate control of moss on managed amenity turf (golf course tees and greens only).

750 g e
Batch No:

THE (COSHH) CONTROL OF SUBSTANCES HAZARDOUS TO HEALTH REGULATIONS MAY APPLY TO THE USE OF THIS PRODUCT AT WORK.

SAFETY PRECAUTIONS

Operator protection

Engineering control of operator exposure must be used where reasonably practicable in addition to the following personal protective equipment:

WEAR SUITABLE PROTECTIVE CLOTHING (COVERALLS) AND SUITABLE PROTECTIVE GLOVES AND FACE PROTECTION (FACESHIELD) when handling the concentrate.

WEAR SUITABLE PROTECTIVE CLOTHING (COVERALLS) AND SUITABLE PROTECTIVE GLOVES when applying by hand-held equipment.

However, engineering controls may replace personal protective equipment if a COSHH assessment shows that they provide an equal or higher standard of protection.

When using do not eat, drink or smoke.

WASH HANDS AFTER USE.

IF YOU FEEL UNWELL, seek medical advice immediately.(show the label where possible)

IN CASE OF CONTACT WITH EYES, RINSE IMMEDIATELY with plenty of water and seek medical advice.

Environmental protection

When treating managed amenity turf (golf course tees and greens only), do not apply within 20m of static or flowing water bodies.

To protect aquatic organisms respect an unsprayed buffer zone to surface water bodies in line with LERAP requirements.

DO NOT ALLOW DIRECT SPRAY from hand-held application to fall within 20 metres of the top of the bank of a static or flowing water body, or within 1 m of the top of a ditch which is dry at the time of application. Aim spray away from water. THIS PRODUCT IS NOT ELIGIBLE FOR BUFFER ZONE REDUCTION UNDER THE LERAP HORIZONTAL BOOM SPRAYERS SCHEME

This product qualifies for inclusion within the Local Environment Risk Assessment for Pesticides (LERAP) scheme. The statutory buffer zone must be maintained and the distance recorded in the LERAP record form. The LERAP record form must be kept available for three years.

DO NOT CONTAMINATE water with the product or its container. Do not clean application equipment near surface water. Avoid contamination via drains from farmyards and roads.

Storage and disposal

THIS MATERIAL AND ITS CONTAINER must be disposed of in a safe way

Risk and Safety Information

MOGETON®

A Wettable Powder containing 250 g/kg Quinoclamine

WARNING

MAY CAUSE AN ALLERGIC SKIN REACTION

CAUSES SERIOUS EYE IRRITATION

MAY CAUSE RESPIRATORY IRRITATION

SUSPECTED OF DAMAGING FERTILITY OR THE UNBORN CHILD

MAY CAUSE DAMAGE TO ORGANS THROUGH PROLONGED OR REPEATED EXPOSURE

VERY TOXIC TO AQUATIC LIFE WITH LONG LASTING EFFECTS

Obtain special instructions before use.

Do not breathe dust.

Avoid contact during pregnancy/while nursing.

Use only outdoors or in a well-ventilated area.

Wear protective gloves/protective clothing/eye protection/face protection.

IF exposed or concerned: Get medical advice/attention.

Take off contaminated clothing and wash it before reuse.

Store in a well-ventilated place. Keep container tightly closed.

Store locked up.

Dispose of contents/container to a licensed hazardous-waste disposal contractor or collection site except for empty clean containers which can be disposed of as non-hazardous waste.

To avoid risks to human health and the environment, comply with the instructions for use

MAPP 15837

IMPORTANT INFORMATION

FOR USE ONLY AS A HORTICULTURAL TURF TREATMENT

Situation	Maximum individual dose (product)	Maximum number of treatments
Managed amenity turf (golf course tees and greens only)	15 kg/Ha	1 per year

OTHER SPECIFIC RESTRICTIONS

Use on managed amenity turf is restricted to golf course tees and greens only

When applying to managed amenity turf (golf course tees and greens only), apply via watering can only in accordance with instructions presented on the product label

When applied to managed amenity turf (golf course tees and greens only), cuttings must not be used for animal feed during the year of treatment

This product qualifies for inclusion within the Local Environmental Risk Assessment for Pesticides (LERAP) scheme. The statutory buffer zone must be maintained and the distance recorded in the LERAP record form. The LERAP record form must be kept available for three years.

READ THE LABEL BEFORE USE. USING THIS PRODUCT IN A MANNER THAT IS INCONSISTENT WITH THE LABEL MAY BE AN OFFENCE. FOLLOW THE CODE OF PRACTICE FOR USING PLANT PROTECTION PRODUCTS

This label is compliant with the CPA Voluntary Initiative Guidance

CONDITIONS OF SUPPLY: The Seller warrants that the goods shall at the time of delivery to the Buyer conform to the Seller's standard specification but all other conditions and warranties, whether

express or implied by statute or custom of the trade or otherwise and whether as to condition, quality, performance, merchantability, fitness for any purpose or otherwise, are expressly excluded and, subject as aforesaid, the Seller shall be under no liability whatsoever, in contract or in tort, for or in respect of any loss or damage whatsoever resulting from or arising out of the goods or supply or use thereof, whether caused by the negligence of the Seller or otherwise. The Seller shall be under no liability in respect of the warranty given above unless the Buyer allows the Seller reasonable opportunity of inspecting the goods where practicable. A consumers statutory rights are not affected.

DIRECTIONS FOR USE

IMPORTANT: This information is approved as part of the Product Label. All instructions within this section must be read carefully in order to obtain safe and successful use of this product.

Mogeton® is a moss killer designed specifically for the elimination of moss (bryophytes) on grassed areas. Its active ingredient quinochlorimol is absorbed by the green elements of moss. It acts by inhibiting photosynthesis. Mogeton® must therefore be applied when moss is present and during a period of active growth. In addition, applying Mogeton® leaves a surface deposit which inhibits the germination of moss spores and, therefore, its effectiveness is extended over many weeks.

Approved dosages and method of application:

Grassed areas:

Against the various types of moss:

1.5 g/m² (15 kg/ha) applied by watering on the infested areas

Volume of water: Application by watering: 1 L/m² (10,000 L/ha)

Number and period of treatments: one treatment per season between May and August

The treatment is carried out after emergence of the moss, during the active growing season (May to August), preferably when the sky is overcast and humidity is high, but not when it is raining. Do not apply during the first year after laying the grass. Grass and grass clippings should not be used for animal feed during the year of treatment.

Application

The effectiveness of Mogeton® is increased in warm humid conditions. In cold dry weather, its effectiveness will be delayed although the degree of effectiveness will not be affected.

Fill the watering can with half the required amount of water. Add and mix Mogeton® then top-up with the remaining water.

Application: To ensure success in combating moss, a good soaking is essential.

A minimum application volume of 1 L/m² (10,000 L/ ha) must therefore be scrupulously adhered to.

Watering can must be fitted with fine droplet sprinkler rose head or dribble bar.

Only the infested areas of the grass should be treated.

Special precautions

Follow these general recommendations

During preparation: Avoid over-filling the watering can. Do not pour rinsing water into the drains; apply it to the treated area.

Do not treat areas with a slope that would allow the product to drain or leach into a water source (ditches, ponds, streams). Mogeton® must not be applied to impermeable surfaces.

After treatment: Wait long enough before re-entering the treated areas to allow the product to dry completely.

Application equipment (watering can) must be thoroughly cleaned with water (fill the watering can with sufficient water to effectively rinse the interior (by agitation of the can) including the lid, stem and rose prior to storage or use on other plants. Dispose of washings on areas of grass that have not been treated with Mogeton®.

Section 6 of the Health and Safety at Work Act

Additional Product Safety Information

(This section does not form part of the product label under the Plant Protection Products Regulations (as amended)).

The product label provides information on a specific pesticidal use of the product; do not use otherwise, unless you have assessed any potential hazard involved, the safety measures required and that particular use has “off-label” approval or is otherwise permitted under the Plant Protection Products Regulations. The information on this label is based on the best available information including data from test results.
