RHINO DS®
MAPP 12763
A powder for dry seed treatment formulation containing 60 g/kg flutolanil for the control of black scurf and stem canker on seed potatoes.

2 kg e
Batch No.:

The (COSHH) Control of Substances Hazardous to Health regulations may apply to the use of this product at work.

SAFETY PRECAUTIONS

Operator protection
This product must only be applied using automated powder dispensing equipment fitted on an automatic planter.
Other engineering control of operator exposure must be used where reasonably practicable in addition to the following personal protective equipment:
WEAR SUITABLE PROTECTIVE CLOTHING (COVERALLS), SUITABLE PROTECTIVE GLOVES AND FACE PROTECTION (FACESHIELD) when handling the product.
WEAR SUITABLE PROTECTIVE CLOTHING (COVERALLS) AND SUITABLE PROTECTIVE GLOVES when handling contaminated surfaces.
However, other engineering controls in addition to those specified above may replace personal protective equipment if a COSHH assessment shows they provide an equal or higher standard of protection.
TAKE OFF IMMEDIATELY all contaminated clothing.
DO NOT BREATHE DUST.
WHEN USING, DO NOT EAT, DRINK OR SMOKE.
WASH HANDS AND EXPOSED SKIN before eating, drinking and smoking and after work.

Environmental protection
Do not contaminate water with the product or its container.
Do not clean application equipment near surface water.
Avoid contamination via drains from farmyards and roads.

Storage and disposal
KEEP OUT OF REACH OF CHILDREN.
KEEP AWAY FROM FOOD, DRINK AND ANIMAL FEEDING STUFFS.
BURY OR REMOVE SPILLAGES
KEEP IN ORIGINAL CONTAINER, tightly closed, in a safe place.
Empty container completely and dispose of safely.
Sacks containing treated seed must not be used for food or feed.

IMPORTANT INFORMATION
FOR USE ONLY AS AN AGRICULTURAL SEED TREATMENT

Crop: Seed potatoes.
Maximum individual dose: 2 kg of product per tonne of potatoes.
Maximum number of treatments: One per batch
Latest time of application: At planting

READ THE LABEL BEFORE USE. USING THIS PRODUCT IN A MANNER THAT IS INCONSISTENT WITH THE LABEL MAY BE AN OFFENCE. FOLLOW THE CODE OF PRACTICE FOR USING PLANT PROTECTION PRODUCTS
This label is compliant with CPA voluntary initiative guidance

A consumers statutory rights are not affected.

RHINO DS
A powder for dry seed treatment formulation containing 60 g/kg flutolanil

WARNING
CAUSES SERIOUS EYE IRRITATION
HARMFUL TO AQUATIC LIFE WITH LONG LASTING EFFECTS

Wash hands thoroughly after handling.
Avoid release to the environment.
Wear protective gloves/protective clothing/eye protection/face protection.
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
If eye irritation persists: Get medical advice/attention.
Collect spillage.
Dispose of contents/container to a licensed hazardous-waste disposal contractor or collection site except for empty clean containers which can be disposed of as non-hazardous waste.

To avoid risks to human health and the environment, comply with the instructions for use

MAPP 12763
DIRECTIONS FOR USE

IMPORTANT: This information is approved as part of the Product Label. All instructions within this section must be read carefully in order to obtain safe and successful use of this product.

Rhino DS controls black scurf and stem canker on potatoes, when applied to the seed at planting.

Crops
Rhino DS can be used on seed potatoes for the ware or processing market. It can be used on the seed tubers of all varieties of early, second early and maincrop potatoes grown for ware or processing. Check with your processor before using Rhino DS on the crop.

Timing
Rhino DS should be applied to the seed tubers at planting.

Disease Control
Rhino DS is a seed potato treatment which controls stem canker and black scurf (*Rhizoctonia solani*). Where soil borne inoculum is high, treatment of seed tubers with Rhino DS may not give full protection against infection of stems and daughter tubers.

Application

**DOSE**
Use Rhino DS at 2 kg per tonne of seed potatoes.

**CROP CONDITIONS**
For best results the tubers should be clean and free from soil (less than 5% of surface). Disease under areas of soil/ dust will not be exposed to dust and will not be controlled. Seed tubers should be of good quality and vigour (free from bacterial rots, physical damage, virus infection etc), and should not be sprouted to such an extent that mechanical damage to the shoots will occur during treatment or planting.

**APPLICATION TECHNIQUES**
On-planter application only - specialised applicators (e.g. Team Sprayers applicator) must be attached to planters to distribute the required amount of product onto tubers as they are being planted.

Storage
Store above 5º C

PROTECT FROM FROST
