

A novel fungicide for powdery mildew control in ornamentals

- New active ingredient and mode of action for ornamental crops with dual activity
- Preventative activity with translaminar (+ vapour) movement giving long term protection on treated leaves. Depending on concentration some curative activity may be seen.
- EAMU approved for use on indoor and outdoor crops
- EAMU has 1 day harvest interval for ornamentals
- Potential users must read 'Extension of Authorisation Number: 1294/2013'
- Wide water volume range and opportunity to control primary inoculum with tailored concentrations
- Two opportunities to use this active on mildew within a programme

Powdery mildew

Use in a programme & spray guide

- Use in a programme with other mildew products
- Use a high concentration on young plants when disease first seen
- Mature plants may require water volumes higher than specified on label. Curative activity maybe compromised if higher water volumes are used
- Consult the Code of Practice if considering using ultra-low water volumes
- Fits well in IPM programmes

Growers must comply with all conditions specified in the EAMU and must be in possession of the Notice of Extension of Use before the insecticide is applied. The EAMU can be downloaded from <https://secure.pesticides.gov.uk/offlabels/search.asp>

Formulation	100 g/l cyflufenamid, suspension concentrate (SC)		
Chemical class	Amidoxime		
Crops	Ornamental plant production		
No. of applications/ Programme use/ coverage	2 (per crop) with 7 days between the applications, but best avoid consecutive applications. Follow FRAC guidelines. Use in a programme with other mode of action products. Use 500 – 1500 l/ha		
IPM Safe	Considered acceptable (based on limited information)		
Max application rate	0.15 L/ha	Harvest period	1 day
Rainfast period	One hour	EAMU no.	1294/2013*
Pack	150 ml pack (1 ha pack)	LERAP	None stated

*Based on label MAPP 16000.

This extension of the authorised use provides for the use of the Takumi SC in respect of crops and situations, other than those included on the product label. No efficacy or phytotoxicity data have been assessed and as such the 'extension of use', is at all times done at the user's choosing, and the commercial risk is entirely theirs.

USE PLANT PROTECTION PRODUCTS SAFELY. ALWAYS READ THE LABEL AND PRODUCT INFORMATION BEFORE USE
