

Tank Mixing Compatibilities

Please read the following before considering using any of the listed tank mixes with Valbon®:

This Compatibility List provides a record of physical compatibility tests that have been carried out with the listed products in a 2-way tank mix with Valbon (17.5 g/kg benthiavalicarb-isopropyl and 700 g/kg mancozeb), unless otherwise stated. No testing of biological compatibility, crop safety or efficacy has been undertaken. Use is entirely at user's own risk and no warranty is given or liability accepted by Certis. Valbon was used at full label rate 1.6kg/ha unless stated otherwise)

Since testing Certis cannot guarantee that every entry on the Compatibility List currently has a valid approval. The occurrence of a particular mix on the list does not, therefore, imply or endorse the legal status of that mix and product labels should always be consulted for each product in the first instance. Other label recommendations on the product labels should also be adhered to.

Ensure constant agitation from mixing to spraying, which should occur immediately after mixing is completed.

Fungicides

Brand Name	Active Ingredient	Commentary
Option	Cymoxanil	Continuous agitation
Sipcam C50	Cymoxanil	Compatible
Ranman Top	Cyazofamid	Compatible
Shirlan	Fluazinam	Compatible

Insecticides

Insyst	Acetamiprid	Compatible
Teppeki	Flonicamid	Compatible
Plenum WG	Pymetrozine	Compatible
Biscaya	Thiacloprid	Compatible
Fury 10 EW	Zeta-cypermethrin	Compatible

Herbicides

Reglone	Diquat	INCOMPATIBLE
