

Tank Mixing Compatibilities

Please read the following before considering using any of the listed tank mixes with Vegas®:

This Compatibility List provides a record of physical compatibility tests that have been carried out with the listed products in a 2-way tank mix with Vegas (50g/l cyflufenamid), unless otherwise stated. No testing of biological compatibility, crop safety or efficacy has been undertaken. Use is entirely at user's own risk and no warranty is given or liability accepted by Certis.

Since testing Certis cannot guarantee that every entry on the Compatibility List currently has a valid approval. The occurrence of a particular mix on the list does not, therefore, imply or endorse the legal status of that mix and product labels should always be consulted for each product in the first instance. Other label recommendations on the product labels should also be adhered to.

Ensure constant agitation from mixing to spraying, which should occur immediately after mixing is completed.
